Beef Antimicrobial Review Form

Guidelines for selection of appropriate beef system.

Select system and circle in the box overleaf – ideally select one system only. If more than one system is operated, highlight predominant system.

Beef System Category	Description
Veal producer	Cattle sold for slaughter at less than 12 months.
Calf rearer	Rears calves on milk away from farm of birth and sells cattle for further growing, finishing or breeding.
Calf rearer finisher	Rears calves on milk and takes them right through to finish.
Suckler breeder grower	Suckler herd that sell weaned calves, stores or breeding stock.
Suckler breeder finisher	Suckler herd, with cattle reared from birth to finish.
Short term finisher	Cattle generally on farm for less than 6 months.
Long term finisher	Cattle generally on farm for longer than 6 months.
Cull cows (dairy fattening)	Fattening of dairy cull cows.
